

DESIGNING FOR EMPATHY WORKSHOP – II

Saturday, March 5, 2022
9:00 am – 5:00 pm EST

REGISTER HERE

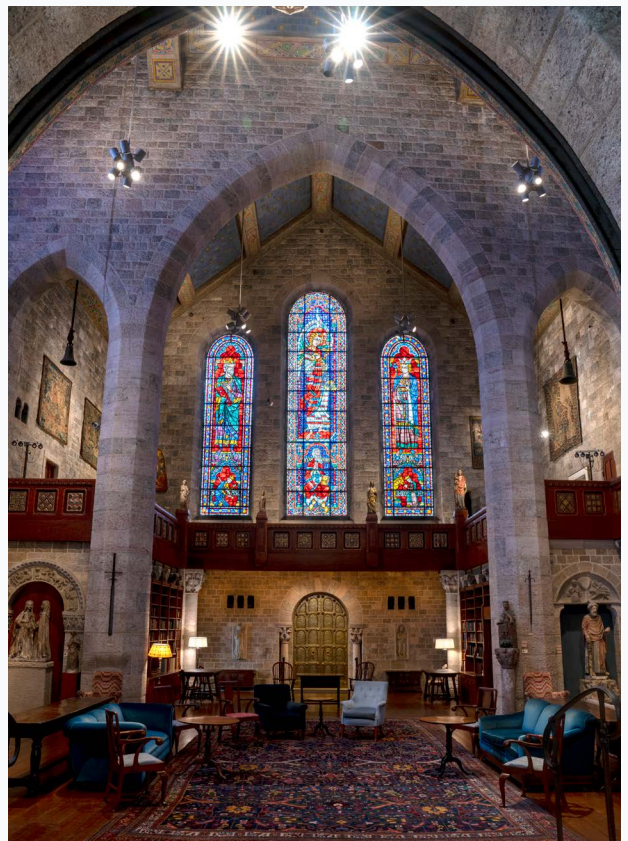

Glencairn Museum and Elif M. Gökçiğdem, Ph.D. invite you to join us in person for this exciting, hands-on workshop in the inspiring setting of Glencairn Museum's spacious Great Hall.

Dr. Gökçiğdem (author and founder of [ONE - Organization of Networks for Empathy](#)) will offer group instruction on theory, program development, and practical application following the Designing for Empathy™ framework. Using objects from the Glencairn Museum collection, workshop participants will develop empathy-building skills through group discussions, prototyping exercises, and facilitator feedback.

This in-person experience is a follow-up to the first Designing for Empathy™ workshop held virtually in April 2021. The content of this second workshop is complete and stands alone. Previous workshop experience is not required. Workshop participants will receive links to resources and recordings to enhance their knowledge on empathy-building through museums and join a growing network of empathy-builders, where year-round work, cross-departmental, and institutional collaboration is encouraged.

Elif M. Gökçiğdem, Ph.D.

Glencairn Museum's Great Hall

Registration is \$125 and includes lunch and refreshments. Registration is required by February 28. Financial assistance is available.
